

Would you like me to personally help in near double digit returns?

From the desk of Bryan Downing
Toronto, Canada

Dear friend

Are you one of the few select traders I am looking forward to help create massive wind falls over the next few months?

If you're one of those, I will work with you to help you potentially return double-digit returns over the next few months as I have shown in my verified crypto trading account.

How do I do this?

I'm hoping to help you put together a strategic trading idea to implement a combination of cryptocurrency trading algorithm systematic bots which can achieve glorious success.

That's right... over the last few months I have been able to find ways to double my portfolio in a short number of months.

Plus, I'll give you some easy to use daily trading indicators that could achieve wild success in a manner of days

This strategic bot is quite easy, I could probably teach your kid this within a day.

What I'm offering you today is an initial strategy session to create a combination of strategies.

Whether you have a retirement account with respectable gains, or you want to consistently have high returns, I'm willing to teach you.

And yes I've been trading these exact same strategies over the last few months And demonstrating to other students (From beginner to advanced) how do you do this over the last number of years.

At the end of this initial strategy session one of the following results will happen:

1. You'll love the plan I want to implement it into your own environment. If this is the case, I wish you all luck but would like to keep in touch to see how you're doing
2. You'll love the plan and ask me to become my client so I can personally help you develop, implement, optimize, and profit from it as soon as possible. If this is the case, we will knock it out of the park!

It is really that simple. I'm offering to show you this strategy I have relied over the last few months for my own portfolio and clients. It is really that simple. I'm offering to show you this strategy I have relied on over the last few months for my own portfolio and clients.

The best and most common outcome is you and I agree to work together to implement these proven robotic strategies.

I have discovered a methodology that has allowed me to live a lifestyle only very few dream about.

I must tell you I am living proof of the generosity from others. I am never worried about some loser taking advantage of me. Nor am I worried about showing you the Best that could change your own life.

So there you have it. So let's prove everyone wrong about how you want to live your life.

So what is the next step?

First I'll need to schedule an online conference to review your background and trading experience. I'll take a look at your portfolio of current strategies. If we are lucky, we will talk about our hopes, dreams and fears.

Once we have all that out-of-the-way I'll help you come up with a simplistic trading plan of action to immediately increase your results.

There might be a list of items I may recommend.

- I might show you how to restructure your strategy to help you create a step-by-step plan to implement it properly.
- How to create a set of trading ideas that make money in all market conditions of bull bear and flat
- How to develop a system that has scientifically been proven with real market data results with potential double digit weekly returns.

My consulting fee is starting to get around \$197 a month

You may think that is a lot but really is it?

Most of my customers will achieve these crazy returns if they fully implement I'm going to let you know about.

You're going to make a lot more than what I charge.

If you got a \$250K account and earning 10% per year ... you could be making three times that which would result in more than \$30,000 in the first year.

If you make that in one year, your return would easily be double in less than three years. Potentially way more!

The lifetime of the strategies could easily be turned into seven digits in coming years.

I have students that have made over six digits within a year.

I'm going to give you a plan on the first conversation that will enable you to make way more than a few thousand dollars.

And look if you don't want to become a customer, don't worry about it. You won't get any kind of sales pitch or pressure from me ever. I'm just not that kind a person

If and only if you decide you love these strategies and you like working with me, you'll decide to pay me to look over your shoulder while trading. I can of course give you all my insights as I research for even more optimal trading ideas.

You need to read this next part very carefully:

This is not for all but here's who I can help:

As you can imagine, I'm very selective who I speak with and I have a reasonable set of criteria that needs to be met in order for us to proceed. Here it is:

- 1) You need to have a basic understanding of technical indicators or at least have the inner drive to learn the basics. I would not worry about this as it is not difficult. However you need to be willing to learn. Quite frankly, not all are willing.
- 2) You also must be willing to work hard with custom trading software connected through your broker/exchange and data provider. All not difficult it's just the same stuff I use.
- 3) You must have enough capital in your portfolio. It must have at least \$10k USA dollars. Or your monthly income has to be high enough to reasonably afford to pay my fee. It must make financial sense for you to work with me. I would think that is common sense.
- 4) Most of all, you need to follow directions. Do not worry as I will not ask you to do anything strange. After all, if you don't implement what is suggested neither of us will make money. I want you to be successful as I have no interest anymore in just billing people.

You Need to be warned...

I cannot help you get rich overnight.

Learning to trade profitably takes a lot of time, discipline and most of all expectations that are

reasonable. If you expect to be making over 200% every year without risk in your money, this is not for you.

Most of my Recent customers have substantial liquid investments that they start with me looking to earn consistent double-digit returns. They know they need to risk the money in order to make even more. They also understand about working hard as I coached them to get the results they seek.

1. Honestly, if you're expecting to turn \$1000 into millions within months, I hate to say it I'm not your guy.
2. I cannot help you if you're not willing to invest the time into your own education. If you do not have even one hour daily available nor cannot make it up on weekends, do not expect me to help you. You need to apply what I recommend which requires time and effort.
3. If you're looking for the quick rich way, I cannot help you. If you're looking for profound change, I understand the effort is difficult. It is essential that you understand what I speak of. I'm interested in changing people's lives. I'm not interested in collecting fees while you could fail.

Why?

If I ever hear someone say "what is the easiest way", what I'm really hearing is "I'm not really wanting to be fully invested into my long-term success with my own trading". This translates to "I really don't want to work".

Now with this out-of-the-way, you understand my requirements. If you believe you still qualify:

This is what I want you to do next

If you meet this criteria I will gladly talk to you personally about getting the best results, and I'll set aside time for you.

This is how the process will work:

First you fill out my application. Don't worry as it's pretty simple. You can download it here

<https://quantlabs.net/consults-application-download/>

I need to fully understand where you are and what your goals are.

I'm also going to ask for a real NON REFUNDABLE deposit of \$997 US. Personally I don't care about that, I want you to understand what you're getting into. You will get access to all my past private online material for the next year as a trial to test yourself.

I'm using this as a filter to keep all the time vampires at bay. I figure if you're going to put up \$997 bucks, you will most likely show up for an online one on one conference.

Now if you're not happy about the results, I will gladly give you a lifetime access to my private chat server giving you all confidential insight that no one else has access to including my public social media followers.

Here is what will happen after that

Once I have your real cash deposit and application I'll set time for us to talk.

The initial call will be between 45 to 60 minutes

This is where we really begin to figure out exactly what you want and how to make it happen. I'll review your goals, your current trading and so on. From there, I'll set up a plan for you to implement right away.

If you see the value in becoming a premium client, great! We will then talk about it.

If you already have a Trading Idea in place, I will try to analyze to see if it is tradable. If it has any real edge, I may code it up to help improve it to help optimize your profit.

If your strategy passes my framework test, I can quickly follow up a plan to execute within a few days, as a result you'll have more confidence in the system that will enable you to achieve your true financial freedom you seek.

Now you may wonder why would I make such a ridiculous offer?

Two reasons:

First of all I love it. Teaching others about algorithmic trading is what I do best, it makes me extremely happy to see others achieve financial success as a result of help I give them. Of course I like working in the trenches with my customers as it helps me stay sharp.

Second of all, this is a method of giving away free training which helps attract consulting clients.

Here is how it works:

If you're like most people I have worked with over the last 10 years, I'm sure you'll be thrilled with the plan we develop.

Most of the time, I get along great with folks like you, if you feel the same, then I'll invite you to become a consulting client.

And if you don't want to become a client, that is OK too. You'll get all my goodies for the next year which is no big deal.

Warning as time is a factor!!

This opportunity is very limited because of the amount of one on one time in order to provide these results.

It is physically impossible for me to work with more than a few select people.

And should you realize that there is a huge demand for personal time from me which is what I'm offering to you that is unprecedented. Do you realize that this window of opportunity will not last long.

This is a really unique opportunity

If you feel this is right for you, respond to my questions in the application you can download here

<https://quantlabs.net/consults-application-download/>

Let's talk!

Conversations are obviously granted on first come first serve basis.

Talk to you later,

Bryan

PS. You might be wondering what you get as a client. What you really get me is the main thing is my personal time.

During the conversation, I hope to give you a strategy with potential profit making plans in place specifically for you based on your objective.

During that session, I'll give you some steps to immediately take for dramatic results.

If you do decide to become a client, I'll schedule a follow up Live session.

During that session will come up with either two things:

1. Short term goals to increase your cash flow
2. A long-term goal to achieve financial freedom with trading results to live your dream life.

During that session, I'll give you some specific steps to complete both goals.

1. We shall speak weekly and in group calls monitoring all your progress to help optimize your trading potential.

2. We shall stay in constant contact via email

This way I can see what you're doing and help you keep the momentum between calls. I highly doubt there is anyone else offering you this type of performance.

So again, If you feel this is right for you, respond to my questions in the application.

Let's talk! Conversations are obviously granted on first come first serve basis.

Don't forget to send over this application to me as soon as possible.

You can download it here
